Come join us for lunch, a movie, and a discussion about sustainable agriculture with **Fred Kirschenmann**, one of the elders of the international sustainable agriculture movement. The movie, "**My Father's Garden**" profiles two farms, and one of them is Fred's farm in North Dakota.

The Stone Barns Center notes that Fred has been "for more than four decades, a champion of organic farming. His work has helped transform what was once obscure and marginal work...resilient, sustainable agriculture focused on the health and restoration of the soil...into an international movement."
